

Shayan Mudassar

Software Engineer | Full-Stack Developer | Node.js, TypeScript, React, AWS
London, UK | +44 7743 352944 | shynmudassar@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Engineer with experience building customer-facing web applications, backend APIs, internal tools, and cloud-based services. Strong hands-on experience with Node.js, TypeScript, React, REST APIs, AWS serverless services, databases, testing, debugging, and production issue investigation. Comfortable working across frontend, backend, integrations, and deployment, with a focus on maintainable code and reliable live systems.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL
Backend: Node.js, REST APIs, API development, authentication, backend services, production debugging
Frontend: React, HTML5, CSS3, responsive UI, REST API integration
Cloud & DevOps: AWS Lambda, SQS, SNS, Cognito, S3, CloudWatch, Docker, CI/CD, GitHub Actions
Databases & Testing: MySQL, PostgreSQL, DynamoDB, Sequelize, Dynamooose, Jest, unit testing, debugging

WORK EXPERIENCE

Backend Engineer Jan 2024 - Present

- Fixfirst | Germany (Remote)
- Built and maintained backend services for customer-facing workflows using Node.js, TypeScript, AWS Lambda, SQS, SNS, Cognito, MySQL, and Sequelize.
 - Developed REST API endpoints and backend logic to support product features, internal workflows, authentication, and asynchronous processing.
 - Investigated and fixed production issues across Node.js/TypeScript APIs, AWS Lambda functions, SQS/SNS queues, CloudWatch logs, and MySQL records to support customer-facing workflows.
 - Improved reliability through better error handling, retry logic, idempotency checks, structured logging, monitoring, and safer failure handling.
 - Worked with frontend and product teams to clarify requirements, fix integration issues, and deliver maintainable backend changes.

Tech: Node.js, TypeScript, AWS Lambda, SQS, SNS, Cognito, MySQL, Sequelize, REST APIs, CloudWatch

Backend Engineer Jan 2022 - Aug 2023

- SMSAMI - FlyAwayHub product | Pakistan
- Transitioned from frontend to backend engineering after applying internally and completing the company interview process.
 - Worked on FlyAwayHub, a cloud-based aviation management platform supporting flight school bookings, resources, reporting, and operational workflows.
 - Built and maintained backend APIs using Node.js, TypeScript, REST APIs, DynamoDB/Dynamooose, and cloud-based deployments.
 - Developed backend features for booking workflows, operational dashboards, internal tools, and business processes.
 - Debugged and resolved issues across Node.js/TypeScript backend APIs, DynamoDB/Dynamooose data flows, and frontend API integrations for FlyAwayHub users.

Tech: Node.js, TypeScript, REST APIs, DynamoDB, Dynamooose, Jest, cloud-based deployments

Frontend Engineer Jan 2021 - Dec 2021

- SMSAMI - FlyAwayHub product | Pakistan
- Joined SMSAMI as a Frontend Engineer and worked on FlyAwayHub, a web-based platform for aviation and flight school operations.
 - Built responsive user interfaces for customer-facing screens, dashboards, forms, and internal workflow pages using React and TypeScript.
 - Developed reusable frontend components and integrated screens with REST APIs for creating, updating, and managing application data.
 - Worked on layout improvements, bug fixes, user experience improvements, and API integration issues across the platform.

Tech: React, TypeScript, JavaScript, REST API integration, HTML5, CSS3

Junior Full-Stack Developer Jun 2019 - Dec 2020

- AYS Electronics - AYS Online | Pakistan
- Worked on AYS Online, the company e-commerce website for electronics and home appliances, along with internal business tools.
 - Built frontend screens and supported backend APIs for product, customer, order, and internal business workflows.
 - Supported banking and payment-related integrations between the website, internal systems, and external providers.
 - Collaborated with business users and technical teams to gather requirements, fix issues, test changes, and improve system functionality.

Tech: Python, backend APIs, relational databases, frontend development, internal tools, third-party integrations

PROJECTS

Sentinel Incident Platform [GitHub](#) - Event-driven incident workflow platform for alert ingestion, incident correlation, state management, idempotency, retries, logging, and observability.

Tech: Node.js, TypeScript, REST APIs, event-driven architecture, AWS-style messaging, queues, retries, logging

Network Anomaly Detection [GitHub](#) - Machine learning project for detecting and classifying network traffic anomalies using KDDCUP99, feature engineering, k-means clustering, and Random Forest models.

Tech: Python, pandas, scikit-learn, KDDCUP99, feature engineering, k-means clustering, Random Forest, model evaluation

EDUCATION

MEng Applied Artificial Intelligence Oct 2023 - Oct 2024

London South Bank University | London, UK
Relevant coursework: Machine Learning, Industrial Cyber-Physical Systems

BSc Computer Science Aug 2016 - Oct 2020

University of Agriculture, Peshawar | Pakistan
Relevant coursework: Data Structures, Distributed Systems, Databases

CERTIFICATIONS

Certified Ethical Hacker (CEH) - LearnPentest | Data Science & Machine Learning - Kamyab Jawan Programme
